BACKGROUND

Jim has nearly 30 years of experience in quality, environmental and health and safety management systems consulting throughout his career starting with Florida Power and Light Company, and IT Corporation. While with FP&L he represented the electric utility industry in Washington, D.C. during the legislative development and rule makings for the Resource Conservation and Recovery Act (RCRA), the Toxic Substances Control Act (TSCA) and the Comprehensive **Environmental Response, Compensation, and Liability Act (CERCLA)**. His assignments included economic impact analysis of legislation and rulemakings and their impact on the electric utility industry. As a Senior Environmental Analyst, he was instrumental in developing environmental programs, including PCB reduction management and Spill Prevention Control and Countermeasure Plan (SPCC) development and implementation for the power plants throughout the FP&L system.

Jim has refined his management and leadership techniques while being a full time consultant for the last 20 years. He has assumed the leadership roles in ISO 9001 and ISO 14001 development programs, training and auditing both domestically and internationally.

His experience not only includes corporate management experience, but he has also worked with professional services organizations troubleshooting financial, project, management and customer risk management issues.

SPECIALTIES

Jim has acquired a unique combination of expertise in analyzing, developing and implementing integrated management systems for Quality, Environment, and Safety. By utilizing a “common sense” approach to business management systems development Jim has been successful in helping companies realize the financial rewards for properly developing and implementing Management Systems. Jim has also been very successful at fostering internal acceptance to needed changes in core business processes from top management as well as throughout the organization. Emphasizing that the business processes should serve the organization and help customers achieve success, Jim has been a leader in identifying opportunities to reduce costs and improve efficiencies within each organization he has helped.

Jim’s areas of expertise include business management system development, change management, environmental compliance, environmental and quality cost accounting, communication at all levels of the organization, training and auditing for a wide variety industries and many of the Fortune Top 50 corporations.

Jim has been an expert witness in PCB litigation.
